

Ideation Phase

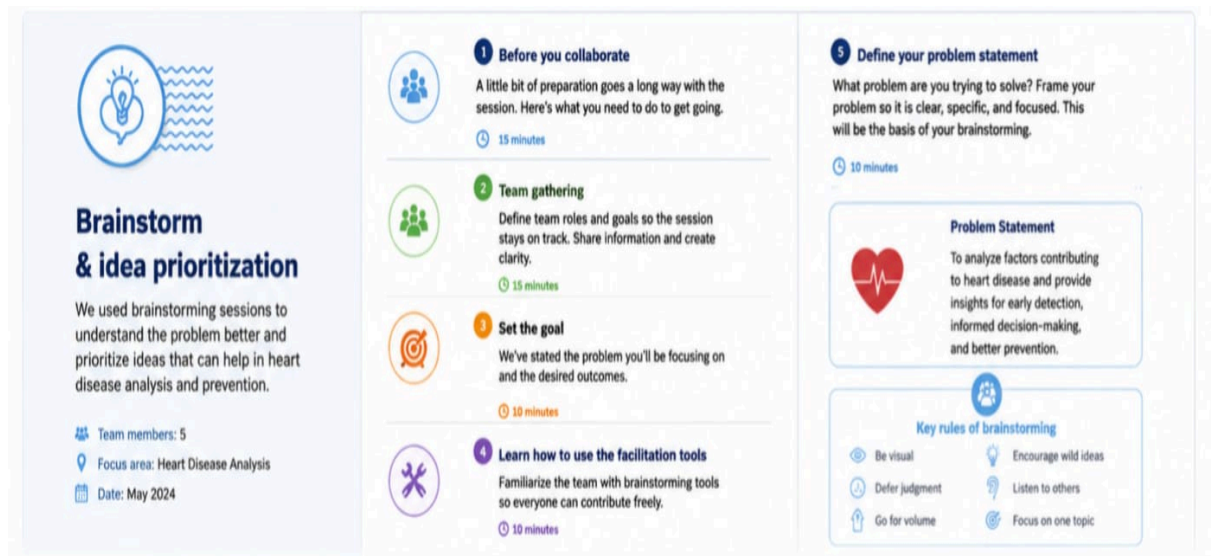

Brainstorm & Idea Prioritization Template

Date	27 JUNE 2026
Team ID	SWTID-2026-6335
Project Name	HEART DISEASE ANALYSIS
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

During the brainstorming phase, several ideas were discussed to address the problem of heart disease using healthcare data. The team explored analyzing the impact of age, gender, BMI, smoking, diabetes, physical activity, and general health on heart disease. After evaluating different ideas based on feasibility, data availability, and usefulness, the most suitable idea was prioritized: developing an interactive Heart Disease Analysis Dashboard using Tableau. This solution enables users to visualize key risk factors, identify high-risk groups, and gain meaningful insights through charts and dashboards, supporting early detection, informed decision-making, and improved awareness of heart disease prevention.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Step-2: Brainstorm, Idea Listing and Grouping

Step-3: Idea Prioritization
