

Project Design Phase
Problem – Solution Fit Template

Date	27 June 2026
Team ID	SWTID-2026-6335
Project Name	Heart Disease Analysis
Maximum Marks	2 Marks

Solution Description:

Dashboard transforms complex healthcare data into meaningful visual insights, enabling healthcare professionals and decision-makers to identify trends, evaluate risk factors, and make informed decisions. The framework helps ensure that the proposed solution aligns with user requirements while improving accessibility, efficiency, and data-driven healthcare outcomes.

Purpose

- Identify the key challenges faced by healthcare professionals in analyzing heart disease data.
- Develop an interactive Tableau dashboard that simplifies complex medical data into clear visual insights.
- Enable faster and more accurate decision-making through real-time data visualization and KPI monitoring.
- Improve communication of healthcare information using interactive charts, filters, and dashboards.
- Support preventive healthcare planning by identifying high-risk patient groups and disease trends.
- Understand current data analysis practices and enhance them through an intuitive, user-friendly visualization platform.
- Provide a scalable solution that assists hospitals, researchers, and public health organizations in monitoring and analyzing heart disease patterns effectively
