

Ideation Phase

Define the Problem Statements

Date	27 JUNE 2026
Team ID	SWTID-2026-6335
Project Name	HEART DISEASE ANALYSIS
Maximum Marks	2 Marks

Customer Problem Statement Template:

Patients and healthcare professionals often find it difficult to identify the key risk factors contributing to heart disease due to large volumes of health data and limited visual insights. The lack of an easy-to-understand analytical platform makes early detection and informed decision-making challenging. Therefore, this project aims to develop an interactive Heart Disease Analysis Dashboard using Tableau to visualize patient data, identify high-risk factors, and provide meaningful insights that support early diagnosis, prevention, and improved healthcare decisions.

I am	Describe the customer and their situation.	Describe the customer and their attributes here
I'm trying to	List their goals or what they are trying to achieve.	List the thing they are trying to achieve here
but	Describe the problems or barriers they face.	Describe the problems or barriers that get in the way here
because	Explain the reasons behind these problems or barriers.	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions or impact caused by the problems.	Describe the emotions the result from experiencing the problems or barriers

Example:

I am	I'm trying to	but	because	which makes me feel
 a patient who wants to stay healthy.	 understand my risk of heart disease and take preventive action.	 it is difficult to interpret medical data and identify the key risk factors.	 health data is complex and not easy to analyze without the right tools.	 worried and uncertain about my heart health.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Patient monitoring my heart health.	Identify my risk factors for heart disease early.	I cannot easily understand my health reports and data.	Medical data is complex and requires analysis from multiple factors.	Anxious and unsure about my future health.
PS-2	A doctor	Quickly find	It takes too	There is no	Frustrated and

	analyzing a patient's heart health data.	high risk patients and provide timely treatments.	much time to analyze data from various sources.	unified dashboard to visualize and compare data.	pressured to make faster decisions.
