HEART HEALTH

Heart Diseases Analysis

	Awareness Recognize the need to evaluate heart health.	Consideration Explore symptoms, risks, and options.	Consultation Meet doctor and share medical history.	Diagnosis Run tests and get heart health insights.	Treatment Plan Receive personalized treatment recommendations.	Treatment & Care Follow treatment and lifestyle plan.	Monitoring Track progress and manage heart health.	Long-term Wellness Maintain heart health and prevent risks.
Steps What the patient does at each stage.	Notices symptoms (e.g., chest pain, fatigue)	Searches information about heart diseases	Books appointment with cardiologist	Undergoes tests (ECG, blood test, echo, etc.)	Discusses results and understands treatment plan	Takes medication, follows diet & exercise plan	Regular check-ups and health tracking	Adopts heart-healthy lifestyle long-term
Interactions What the patient interacts with.	Online articles, ads, community awareness	Websites, symptom checkers, family advice	Clinic staff, doctor, medical forms	Lab technicians, diagnostic equipment	Doctor, nurse, dietician (if needed)	Pharmacy, fitness trainer, nutritionist (if needed)	Health apps, wearables, follow-up team	Support groups, wellness programs, periodic screenings
Goals & Motivations What the patient wants to achieve.	Stay informed and recognize warning signs	Understand risks and know when to seek help	Get expert opinion and reassurance	Know the exact cause and severity of condition	Receive clear and actionable treatment plan	Manage symptoms, reduce risk, improve health	Monitor progress, adjust treatment if needed	Prevent future problems and live healthier
Positive Moments What creates trust and satisfaction.	Easy access to reliable heart health info	Clear information helps reduce anxiety	Doctor listens and explains clearly	Quick, accurate and comfortable testing	Personalized plan and clear explanations	Symptoms improve, energy increases, feel better	See progress in test results and well-being	Confidence in living a heart-healthy life
Pain Points What causes frustration or concern.	Ignoring symptoms or lack of awareness	Confusing or scary information online	Long wait times, high consultation fees	Expensive tests, long wait for results	Complicated terms and treatment options	Side effects, medication cost, lifestyle changes	Forgetting medications or appointments	Lack of motivation, relapse into unhealthy habits
Areas of Opportunity How might we improve the experience.	Create awareness campaigns and screening camps	Provide reliable symptom guidance tools	Simplify booking and reduce waiting time	Affordable test packages and faster reports	Use visuals and simple language for better clarity	Personalized follow-ups and lifestyle coaching	Reminders, tracking tools, tele-consultation	Long-term care plans and community support
