

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	28 June 2026
Team ID	SWTID-2026-6335
Project Name	HEART DISEASE ANALYSIS
Maximum Marks	4 Marks

Functional Requirements:

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Patient Registration	Registration through Form Registration through Gmail
FR-2	User login	Login using email & password, forgot password
FR-3	Health Data Entry	Enter age, blood pressure, cholesterol, heart rate, blood sugar, ecg, chest pain type
FR-4	Health Disease Prediction	Analyze health data, predict risk, display prediction result
FR-5	Report Management	View prediction report, download report, view prediction history
FR-6	Doctor Recommendation	Doctor review report, provides treatment & lifestyle recommendation.

Non-functional Requirements:

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system should be easy to use with a simple and user-friendly interface.
NFR-2	Security	Patients must be protected using secure login and data encryption.

NFR-3	Reliability	The system should provide accurate prediction and remain available without failures.
NFR-4	Performance	The prediction result should be generated within a few seconds after submitting health data.
NFR-5	Availability	The system should be available 24/7 to allow users and doctors to access heart disease analysis and reports whenever needed.
NFR-6	Scalability	The system should be able to handle an increasing number of users and patient records without affecting performance.
