

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	27 June 2026
Team ID	SWTID-2026-6335
Project Name	HEART DISEASE ANALYSIS
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Import Dataset	Load the Heart Disease CSV dataset into Tableau.
FR-2	Data Preparation	Clean and preprocess data, handle missing values, and create calculated fields.
FR-3	Dashboard Visualization	Create interactive charts, KPIs, filters, and story dashboards for heart disease analysis.
FR-4	Data Analysis	Analyze heart disease trends based on age, gender, BMI, smoking, alcohol consumption, diabetes, stroke, and other health factors.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The dashboard should be simple, interactive, and easy for users to navigate
NFR-2	Security	Project files and datasets should be securely stored

		with controlled access.
NFR-3	Reliability	The dashboard should display accurate and consistent analytical results.
NFR-4	Performance	Visualizations and filters should load quickly and respond efficiently
NFR-5	Availability	The Tableau workbook should be accessible whenever required on Tableau Desktop or Tableau Public.
NFR-6	Scalability	The dashboard should support additional datasets, visualizations, and healthcare indicators in the future.
